### Tampa Specialty Treatment Expansion

Felton Construction was tasked to provide plumbing and mechanical construction to the James A. Haley Veterans' Hospital in Tampa, FL. Our scope of work includes both mechanical and plumbing. The plumbing scope includes water service, DWV (Drain, Waste and Vent) piping, medical gas service tying into the existing hospital services. The plumbing scope also includes the installation of fixtures and other medical equipment. The mechanical scope includes the relocation of existing condenser units, the installation of new air handler units, and duct work with Variable Air Volume boxes installed.

### Design-Build Renovation of Barracks Bldg 3750 – Ft. Campbell

Felton Construction was contracted to demolish and install the plumbing for the Renovation of Barracks BLDG 3750 at FT Campbell, KY. The Volar Barracks is a 3 module, 3 Story barracks with 11,730 square feet of space. Our scope of work includes water service, DWV piping, fixtures and water heaters for the barracks rooms and for the common spaces throughout the building.

### Construct Addition and Renovation to the JACC – Pensacola

Felton Construction was contracted to provide plumbing and mechanical construction to the VA Hospital in Pensacola, FL. This project is to construct an addition and to renovate the existing JACC within the hospital. This project scope includes both plumbing and mechanical construction. The plumbing scope includes water service, DWV piping, and medical gas services and well as fixture and other equipment installation. The mechanical scope includes variable air volume boxes, duct work, air handler units, and a cooling tower.
